## SKILLS

**Languages:** Java, JavaScript, SQL, HTML, CSS

**Frameworks & Libraries:** Spring Boot, Spring Security, Hibernate, JPA, JOOQ, Thymeleaf

**Database:** MySQL, PostgreSQL, MariaDB, Redis

**Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Linux, GitHub Actions, Self-Hosted Actions Runner

**Authentication & Security:** Spring Security, JWT, Auth0, Okta

**Testing:** JUnit, Mockito

**Frontend:** HTML, JS, CSS, Bootstrap, Tailwind CSS

**Concepts:** System Design, SOLID Principles, REST, Multithreading, Virtual Threads, Java Streams, CI/CD Pipelines

## WORK EXPERIENCE

**RBZ Infotech, Chennai**

Mar 2022 – Present

### Java Developer

- Architected and delivered a scalable healthcare platform using Java, Spring Boot, Hibernate, and RESTful APIs, supporting 6+ core modules including online appointments, patient forms, check-ins, payments, and two-way communication.
- Optimized MySQL database schemas and complex queries, reducing query execution time by ~20% and enabling high-performance handling of high-traffic workloads.
- Implemented secure authentication and API integrations using Auth0 and OAuth 2.0 tokens, enabling seamless and secure access to third-party healthcare APIs while ensuring role-based access control and data protection.
- Developed, tested, and integrated 20+ RESTful APIs (including third-party EHR/PM systems) using JUnit and Mockito for unit and integration testing, ensuring robust features like scheduling, online check-ins, and payments with seamless interoperability.
- Engineered end-to-end patient workflow automation (online forms, reminders, check-ins, and payments) by integrating Plivo for SMS/communication and Stripe as the payment gateway, reducing paperwork by ~85%.
- Automated CI/CD pipelines using GitHub Actions and AWS EC2, reducing manual deployment effort by ~60%, and deployed applications on Nginx and Apache2 servers.
- Led backend development and code quality initiatives using Git, GitHub, and Maven, conducting code reviews, implementing test coverage improvements, and performing performance tuning that increased release efficiency by ~30% in an Agile environment.

## KEY PROJECTS

### Practice Management Software

[growpractice.com](https://growpractice.com)

- Developed a responsive healthcare business website showcasing 15+ services, improving user interaction and online visibility by ~40%.
- Implemented responsive design and cross-device compatibility using Bootstrap, ensuring fast loading across desktop and mobile and improving user experience for 1000+ monthly visitors.
- Deployed and maintained a production-grade website on a Linux-based private VPS using Nginx, configuring virtual hosts to securely host multiple websites and achieving 99.9% uptime.
- Technologies:** Java, Spring Boot, Hibernate, MySQL, RESTful APIs, Auth0, OAuth 2.0, JUnit, Mockito, Plivo, Stripe, Nginx, Apache2, GitHub Actions, AWS EC2, Git, Maven

### Matrimonial Application

[matrimonyexpert.com](https://matrimonyexpert.com)

- Developed a full-stack matrimonial services platform using Java (J2EE) for backend development, delivering 5+ core matchmaking features and supporting 1,000+ user profiles, enhancing user engagement by ~35%.
- Designed and optimized a MySQL relational database schema to efficiently manage and query large-scale user data, improving query performance by ~30% and ensuring data consistency.
- Built dynamic and responsive user interfaces using HTML, CSS, JavaScript, and jQuery, achieving cross-browser compatibility across 4+ major browsers and improving user experience metrics by ~25%.
- Deployed and maintained the application on Apache Server, ensuring 99.9% uptime and stable production performance through effective configuration and monitoring.
- Technologies:** Java (J2EE), MySQL, HTML, CSS, JavaScript, jQuery, Apache Server

### Construction Business Website

[syvetconstruction.com](https://syvetconstruction.com)

- Developed and deployed a responsive construction business website showcasing 10+ services and projects, improving user engagement and online visibility by ~30%.
- Designed and implemented interactive UI components and lead generation forms (Contact, Get Quote, Careers) with cross-browser compatibility, enhancing user experience and increasing client inquiry conversions by ~25%.
- Managed source code and version control using GitHub and independently deployed the application to production, ensuring reliable hosting, maintainability, and 99.9% uptime.
- Technologies:** HTML, CSS, JavaScript, GitHub

## EDUCATION

### University of Madras

2018 – 2021

Bachelor of Computer Applications (BCA)

Relevant Coursework: Object Oriented Programming, Database Management Systems, Web Technologies, Data Structures, Computer Networks, Software Engineering
